3. Demo Picture Of Project
4. Advantages
5. Disadvantages
6. Summary
7. Conclusion

- Introduction

Teacher Record Management System provides user friendly, automated monitoring and management tools for all your classes. These sophisticated tools support students individually as well as classes where students have mixed learning abilities. Teachers can reduce the time typically spent managing curriculum software with features like concurrent licenses, an unlimited student database, automated writing evaluation, test scoring, calculation of grades and generation of real time reports. This allows more time devoted to students' English language learning needs and provides decision-makers with the data needed to be informed about their English learning programs.
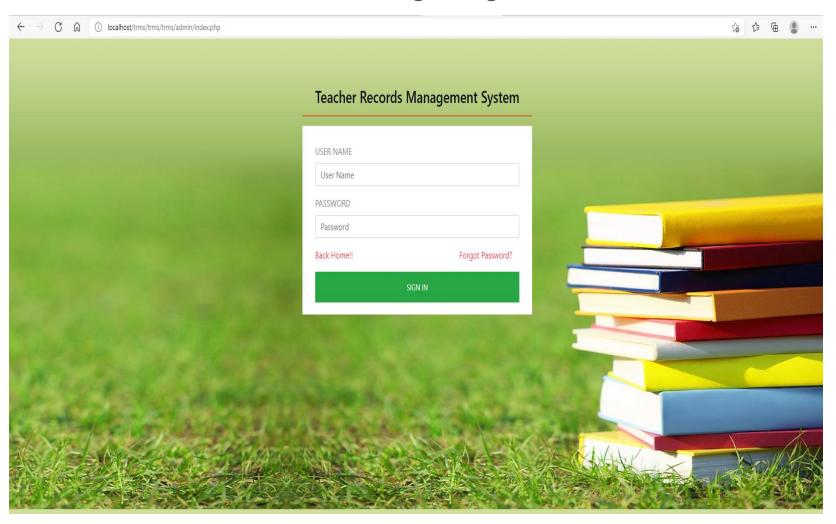

- Requirement

1. Front-End : HTML, CSS , JAVASCRIPT.

2. Back- End : PHP, MYSQL, DATABASE.

3. Framework: BOOTSTRAP.

4. Software : VS-CODE, XAMPP.

5. Web Browser: Google Crome, Microsoft Edge.

# Admin Log In Page

# Dashboard page

# Manage Subject Page

# Manage Teacher Page

# Admin Profile Page

# Password Changing Page

❑   Advantages

1. Control the Generation and Growth of Records

2. Effectively Retrieve and Dispose Records

3. Assimilate New Records Management Technologies

4. Regulatory Compliance

5. Minimize Litigation Risks

6. Safeguard Important Information

7. Cut Costs, Save Time & Efforts

- Disadvantages
1. Changes in technology adoption
2. Infrastructure barriers
3. Susceptible to ceating

- Summary

1. Home
2. Log in
3. Search
4. Password
5. Dashboard
6. Add subject
7. Manage subject
8. Add teacher
9. Manage teacher
10. Report
11. Admin profile and log out etc.

- Conclusion

After working on this website I've become very interested in learning more about Bootstrap/CSS so that will be one of my areas of interest to do some independent making website on. Ultimately, I would really like to pursue web design as a career path and I enjoy working with this website making code,
